

1. Ask the enter a number and find the square of the number

repeat the above task 5 times

```
In [2]: for i in range(5):  
        num = int(input("Enter a number: "))  
        square = num ** 2  
        print("Square =", square)
```

```
Square = 729  
Square = 7921  
Square = 9409  
Square = 8100  
Square = 2025
```

2. Ask the user enter a number get it is an even or odd

repeat the above task 5 times

```
In [3]: for i in range(5):  
        num = int(input("Enter a number: "))  
  
        if num % 2 == 0:  
            print("Even Number")  
        else:  
            print("Odd Number")
```

```
Even Number  
Odd Number  
Even Number  
Even Number  
Even Number
```

3. Ask the user print 7th table range 1 to 11

7x1=7 7x2=14

```
In [4]: num = int(input("Enter a number: "))  
  
        for i in range(1, 11):  
            print(num, "x", i, "=", num * i)
```

```
7 x 1 = 7
7 x 2 = 14
7 x 3 = 21
7 x 4 = 28
7 x 5 = 35
7 x 6 = 42
7 x 7 = 49
7 x 8 = 56
7 x 9 = 63
7 x 10 = 70
```

4. Ask the user print only 'a' from a string 'hai how are you'

```
In [5]: text = input("Enter a string: ")

for ch in text:
    if ch == 'a':
        print(ch)
```

```
a
a
```

5. Ask the user get a random number between 1 to 10

user enter a number between 1 to 10

if both are match print won otherwise lost

give only 3 chances

```
In [7]: import random

random_number = random.randint(1, 10)

for i in range(3):
    user_number = int(input("Enter a number between 1 and 10: "))

    if user_number == random_number:
        print("You Won!")
        break
    else:
        print("You Lost!")

print("Random Number was:", random_number)
```

```
You Lost!
You Lost!
You Lost!
Random Number was: 4
```

6. Ask the user print only vowels from a string 'ola ola ola'

```
In [8]: text = input("Enter a string: ")  
  
for ch in text:  
    if ch in "aeiou":  
        print(ch)
```
